

# User Manual Anti-Frost-VOEN

Dear Customer,

To ensure the correct and safe functioning of the Anti-Frost-VOEN, please read the user manual completely **before first use** and follow **all safety advice**.

**Important:**

**Please keep this manual for future reference.**

## **Installation and Use**

**If the advice given in this user manual is ignored, no liability will be assumed!**

The Anti-Frost-VOEN is exclusively been developed for use in fruit orchards. No other use is permitted!

**1.** Place the Ant-Frost-VOEN on to a flat, stable, even, heat-resistant und non-flammable surface.  
Please ensure a secure footing of the Anti-Frost-VOEN before its first use!

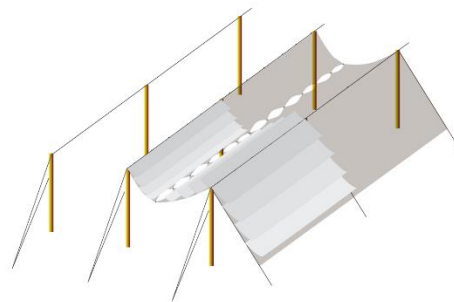

**The Anti-Frost-VOEN is only permitted for outdoor use.  
Indoor use and use in closed premisses is not  
permitted!**

**Attention! Der Anti-Frost-VOEN will become very hot!** Do not step close the fire opening of the Anti-Frost-VOEN when hot, because of particularly intense heat in that area!

**Please always wear heat-resistant and fire-retardant gloves.**

**2.** Before filling the burner with wood pellets, please place standard fire starters onto the grill inside the burner. Always use standard wood pellets. Before first use please fill with 25 – 30kg wood pellets.

**3.** Light the fire starters with a common gas torch or similar. (Hint: Use a liquid fire starter to light safely)  
Ensure that the flammable started has been lit and the burning process has started securely.  
**Please ensure maximum ventilation.**

4. Please let the fire/embers extinguish themselves. Please also ensure that the Anti-Frost-VOEN has completely cooled down before the Anti-Frost-VOEN is stored away.

5. During the burning process remove the lid of the hopper as condensation can build up and the burning process can be inhibited.

**6. For re-filling of the hopper or approaching the burner please wear a protective mask due to the development of carbon monoxide and smoke.**

7. For a desired burning period of longer than 6 hours a hopper extension can be added for increased burning capacity (then up to 9 hours of burning time).

8. For an intended long-term use we recommend a thorough maintenance clean of the Anti-Frost-VOEN in the spring and storage in a dry area.

## **General Safety Advice**

1. The Anti-Frost-VOEN is only permitted for outdoor use with good ventilation.
2. Keep children and animals away from the Anti-Frost-VOEN.
3. The Anti-Frost-VOEN will be very hot. The Anti-Frost-VOEN must not be touched when in use. There is a high risk of burning. Always wear protective gloves!
4. The surface for the Anti-Frost-VOENs must be even and non-flammable. The Anti-Frost-VOEN must be stable and not move.  
Before its first use it must be ensured that the advice in the manual has been followed.
5. We recommend to keep a fire extinguisher ready.
6. Beware of flying sparks.
7. When in use do not touch or move.
